Adding Source Files at the Engineering Step

In certain scenarios, projects involve more complex and varied content that may require updating or expanding source files after initial project creation. This course introduces a streamlined way to do just that - directly at the Engineering step.

TARGET AUDIENCE

This mini-learning is designed for Engineers working with Trados Accelerate and Enterprise - though Project Managers may also find it useful.

COURSE DETAIL

The course will cover the following:

- The configurations needed to enable this feature
- Examples of real-world use cases where it is especially valuable
- A step-by-step walkthrough of the process in Trados
- Helpful links to additional resources

LEARNING OBJECTIVES

By completing this eLearning, you will learn how to configure and use the option to add source files at the Engineering step in Trados in the Cloud to streamline complex or evolving translation projects.

DELIVERY

Hosted on the RWS University learning portal, this self-paced micro-learning course allows users to self-register and access the content individually.

COURSE DURATION

The course is approximately 10 minutes in duration and can be viewed and then used as a post-course reference tool.
